#### **Chaffing Dish and Urn (Using Sterno Type Heat)**

1. **DO NOT** use anything but **STERNO TYPE FUEL** in the burner.
2. **NEVER** light the burner unit before putting liquid into the water pan, urn or kettle body. Low flame is sufficient to maintain proper heat.
3. **DO NOT** put unit on a hot stove or an open flame.
4. Stainless steel food pans can be used for cooking. They can also be placed in the oven to keep food hot.
5. Chaffing dish water pans should be filled with hot water. Check water pan when in use to insure sufficient water contained at all times. **DO NOT USE WITHOUT WATER.**

#### **Use of Sterno**

Pry the lid off of Sterno and set Sterno container into the heat cup. Light Sterno and adjust the lid of heat cup at approximately ½ open, One can of Sterno should last from 1 to 1½ hours.

#### **Chafing Dish and Urn (Using Alcohol Burner)**

1. Use **ONLY ALCOHOL** in burner unit. **NEVER** use lighter fluid, gasoline or kerosene.
2. **NEVER** light burner unit before putting liquid into water pan or urn. Low flame is sufficient to maintain proper heat. The wick should not extend more than ¼ inch above wick opening.
3. **DO NOT** put unit on hot stove or open flame
4. **DO NOT** overfill. Wipe burner dry before lighting.
5. Chafing dish water pans should be filled with hot water. Check water pan when in use to insure sufficient water is contained at all times. **DO NOT USE WITHOUT WATER.**
6. **KETTLES AND URNS** must always contain at least 1½ cups of liquid while in use. **BEFORE** lighting fill with hot coffee or tea. Burner unit may then be turned up full and lit. Before drawing liquid from urn or kettle, reduce wick raiser down until only the top row of holes is visible (approximately ¼ inch of wick will be exposed.) Leave flame at this level as long as liquid remains in the urn or kettle. Shut off burner when liquid is withdrawn.

We suggest you use an underliner tray with items using burners to protect serving surface.

#### **WARNING!**
