POP UP TENTS

WARNING: Pop up tents are shade canopies and are not designed for rain protection. Rain water will build up on canopy top & collapse canopy.

WARNING: The canopy top must be removed before collapsing the frame for transport. Failure to do so will result in bending or breaking the canopy frame.

SET-UP

1. Stand the frame upright. Gently pull the legs apart.
2. Place canopy top over partially opened frame. Align corners of top with corners of frame. Expand frame by raising truss bars until sliders "click".
3. Adjust canopy height by extending legs until desired height is achieved.
4. For stability anchor with stakes or optional metal bases.

TAKE-DOWN

1. Fully retract all lower leg extensions by depressing latching buttons at sliding leg sockets and move sockets below the latching button.
2. Push frame together $\frac{1}{4}$ to $\frac{1}{2}$ way only.
3. Remove top (Top must be removed before completely collapsing frame or damage will occur).
4. Finish collapsing frame.
